OBJECTIVE

Seeking a challenging role in a dynamic organization where I can leverage my strategic thinking, creative problem-solving skills, and expertise in data analysis to drive impactful business growth and cultivate strong customer relationship.

EXPERIENCE

Full-Stack Developer | RS Technologies (Jun 2023 – Present)
- Constructed Rest API using NodeJs with proper authentication using JWT as per the requirement and integrating the rest-API using reactJs. Also involved in product planning which includes database Schema design and user stories.
- Followed all the coding standards and naming conventions, Meanwhile also involved in reviewing the code before committing the changes in the git repo.
- Collaborated with the cross-functional teams for the Rest API integration, product enhancement and to ease technical difficulties and also involved with them for API integration.
- Contributed for the organization to build the error free product and also trained employees with the backend framework.

Programmer | Chain-sys India Pvt Ltd (Oct 2021 – May 2023)
- Reduced user reported defects by analyzing the root cause of the issue and provide temporary or permanent fixes for bug by doing code fix.
- Involved in committing the code to git repo and test the defect scenarios locally and monitor the defect until deployment is done so that no performance or additional issues are raised due to my code change.
- Co-Operated with cross functional teams to understand new feature enhancements which are raised as Change requests (CR) and understanding the technical difficulties in that and plan for the implementation duration.
- Responsible for giving sprint knowledge transfer (KT) to QA and support teams for any bug fixing which affects existing functionality once new enhancements are completed.
